

IGOR KONONOV

iOS Developer

Work Experience

About Me

With 1.5 years of valuable commercial experience as an iOS developer, I confidently take on responsibility for projects of any complexity. I eagerly embrace challenges and am always ready to tackle difficulties head-on. Helping and supporting colleagues is not just a duty but a habit. I am delighted to assist fellow developers when they encounter technical issues. Creating a collaborative environment where knowledge is shared and teamwork flourishes is essential to me.

My passion for app development and my drive for continuous growth and improvement enable me to achieve outstanding results. I am always focused on finding innovative solutions and keeping up with the latest trends in the world of iOS development. I am proud to continue my professional journey, bringing my skills and dedication to achieve great success in future projects. Here are some of the apps I have developed:

Contact Me

varvarn1@gmail.com

Kyiv

No Name Digital

June 2023
NOW

SwiftUI, UIKit

FirebaseRealm, UserDefaults, CoreData

I worked with such frameworks: Combine, Hopoate, WidgetKit, PushWoosh, Adjust, SwiftyStoreKit, WebKit, DropBox
MVC MVVM.

I am an experienced app developer with a focus on creating innovative solutions. My portfolio includes diverse projects using both SwiftUI and UIKit. I specialize in crafting attractive and intuitive user interfaces.

Additionally, I actively engage in mentoring and assisting junior specialists, sharing my knowledge and experience to help them grow professionally. My constant drive for self-improvement keeps me up-to-date with the latest trends and enables me to utilize cutting-edge technologies in my work.

I am eager to apply my skills and creativity to reach new heights in app development.

Next Level Apps

April 2023
June 2023

UIKit

Realm, CoreData

I worked with such frameworks: SwiftyJSON, REST API, Adjust, Pushwoosh, Firebase, Ads
MVC

I have worked on projects that were incomplete and prone to crashes, and I was tasked with fixing them and adding additional functionality to these projects.

Here are some of the apps I have developed:

Auto Clicker: [Auto Clicker - Automatic Tap](#)

Habster - A habit tracker and journaling app.

App Store: [Habit Builder - Atomic Habits](#)

GeneratorCare - An app with a stopwatch for tracking generator fuel usage.

App Store: [GeneratorCare](#)

There are also a lot of cool projects that haven't hit the AppStore yet.

My project.

HoroscopeMe - An app that combines horoscope and tarot card readings.

App Store: now deleted =(

NOVA

April 2022 -
April 2023

SwiftUI

Firebase: Analytics, Crashlytics, Events, Authentication, Firestore...

Realm, UserDefaults, CoreData

I worked with such frameworks: Combine, Hopoate, WidgetKit, MapKit, Kingfisher...
MVVM, MVVM+R.

I have developed applications from scratch, taking full ownership of their visual design and providing assistance to my colleagues with SwiftUI. From conceptualization to implementation, I dedicated myself to creating remarkable designs that aligned with the app's purpose and functionality. Additionally, I actively supported my team members by sharing my expertise in SwiftUI and offering guidance whenever needed.
